PENSION REFRESH FACILITY

Please read the following information regarding the pension refresh facility before you complete this form.

The pension refresh facility provides an easy way for you to consolidate your existing pension account balance with any additional accrued superannuation benefits at any time after you have commenced your pension. This may be particularly useful, for example, if you continue working and receiving superannuation contributions after you have commenced receiving a pension, as it does away with the need for multiple pension accounts if you also want to take those additional superannuation benefits as a pension.

The pension refresh facility works as follows:

- your existing pension account balance is rolled into a new or existing accumulation account and combined with any additional superannuation benefits that you've accrued in or transferred into your accumulation account
- some or all of your then combined accumulation account balance is transferred back into a new pension account to commence a new pension
- when establishing a new pension account you also provide us with instructions on:
 - pension amount
 - pension payment payment frequency, payment date, annual increase and bank account
 - any beneficiary (including reversionary) nomination
- if you don't provide instructions on your new pension account, the same details that applied to your previous pension account will apply to your new pension account (unless a new minimum payment amount is required under the law)

You should seek financial advice before using the pension refresh facility as there are likely to be associated financial, taxation and social security implications from moving your benefits between superannuation and pension arrangements.

To be eligible for this service, you must:

- hold both an accumulation and a pension account
- be eligible to commence a pension (account based pension or transition to retirement account based pension).

If you do not have an existing accumulation account, you will need to open one prior to commencing a pension refresh. Please contact us for more information.

Your current personal information, investment and payment instructions for your existing pension account will be transferred to your new pension account. Your new pension account will not commence until all transactions requested or required as part of the pension refresh process have been completed. In some cases regular business processes may need to be carried out before some steps of the pension refresh process can be completed, which may delay its completion.

Before completing this form, you should:

- read the current Perpetual Small APRA Fund Service Product Disclosure Statement, or the current Perpetual Self Managed Super Fund Service Administration Service Guide (as applicable), which include important information on the operation of your super and pension accounts
- consult a financial and/or tax adviser and have them assist you to complete this form
- consider the tax and social security implications associated with your transaction/s.

Please complete this form if you would like to have your existing pension account and super account used to commence a new pension account. The form also provides you with the option to contribute additional funds into your existing accumulation account and also to claim a tax deduction and complete a re-contribution (optional).
