We have governance, frameworks and monitoring in place to ensure we have resilient technology systems and secure data, including:

- Technology and Cyber Committee, a sub-Committee of the Board, providing oversight of technology and cyber risk. D
- ata Management Framework covering how data are managed across Perpetual Group.
- Internal reporting to management and the Board on the effectiveness of our security controls.
- Enhanced oversight and monitoring of select critical third-party service providers on cyber security.
- Additional data logged and analysed on the use of IT systems and applications to improve incident detection and forensics capabilities.
- Training and tools to educate employees on cyber security risks, email phishing and data privacy.
- Data breach and cyber-incident response plans and regular crisis management response simulation exercises to effectively manage any security incidents.

More information is available in our Privacy Policy.
